

## **Bell Atlantic Federal Systems Stands Ready...**

### **to meet the federal government's mission-critical communications and networking goals.**

At Bell Atlantic Federal Systems, we're committed to becoming the preferred provider of total communications solutions to the Federal government.

We're well on our way to accomplishing our goal, in part because of our ability to draw on the extensive corporate resources of our parent company, Bell Atlantic. But more importantly, because of what we can offer to potential federal customers:

#### **Extensive Experience with Complex Government Telecom Networks**

We've used advanced information technologies to develop and manage over 50 government contracts. That gives us a proven record for project management, technical solutions, and integrating multiple vendors' communication technologies that federal managers can depend on.

#### **Versatile and Effective Teaming Arrangements**

We have teaming arrangements with companies like Computer Sciences Corp., Raytheon E-Systems, Allied Signal, TDS, Inc., Digital Systems Research, Teleport Communications Group that guarantee technological excellence, quality performance, and global presence.

#### **Access to New Technologies**

This year Bell Atlantic will spend over \$2 billion for network upgrades, that means we can offer our federal customers the latest communications solutions as soon as they become available.

#### **Financial Options**

We're committed to helping federal managers find cost-effective communications solutions, especially in today's climate of increasing budget and funding restraints. And because of the significant buying power of our parent company, we can leverage vendor relationships to provide additional savings.

#### **Timely Response to Specific Requirements**

Because we're continually assessing the unique communications requirements of civilian federal agencies and the Department of Defense, we can respond to federal information technology (IT) procurements quickly and provide post-award solutions promptly.

**Visit our Federal Systems Home Page at <http://www.bell-atl.com/federal> and find out more about our federal contracts**

**Sidebar materials:****Available information technology applications include:**

- Advanced Premises Systems (inside/outside plant engineering and installation)
- ATM LAN Office Backbone
- Bell Atlantic Operating System Control (BAOSC) 2000
- Fast Packet Data Services (ATM, SMDS, FRS, FNS)
- Integrated Services Digital Network (ISDN)
- Network Integration Services - LAN Engineering and Implementation Services
- Telecommuting Services
- Video Conferencing
- Voice Processing Systems

**Some of Bell Atlantic Federal Systems custom solutions contracts include:**

- ARPA ATDnet MDA-972-94-C0003
- Cable Distribution Systems (CDS) DAJA22-96-D-0073
- DoD-TEMPO MDA-903-92-D-0013
- GSA Schedules 58 & 70 B/C #GS-35F-1025D (58-voice), #GS-35F-3030D (70-data)
- GSA-ASP GS00K-92-AHD-0003
- GSA-WITS GS00K-89-ADH-0011
- NAS Patuxent River-NAWCAD N68-939-95-D-0003
- NIH CIO-SP (Subcontractor to CSC)
- U.S. General Accounting Office 1130049
